Complex care in your home

Somerset Care has a complex care team that can support adults with ongoing healthcare needs. We deliver this service to people living in their own homes across Somerset and Wiltshire.

Your care

We strive to provide compassionate and competent care, supporting people who live with a variety of medical conditions, including:

We support with regular tasks including:

Complex medication

PEG/RIG/JEJ care

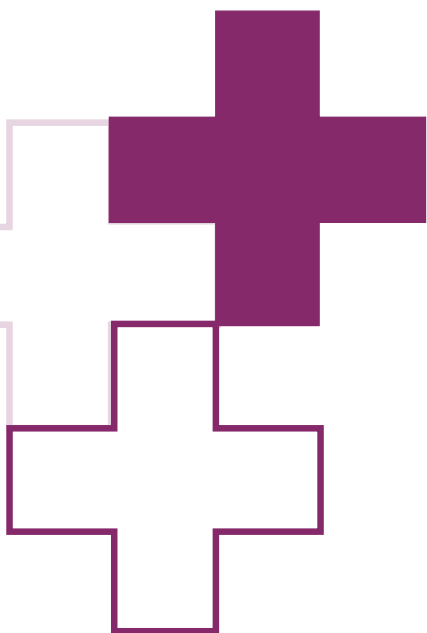

Cough assist

Bowel management

Non-invasive
ventilation

Oral/tracheal
suctioning

Tracheostomy care
including ventilation

Your carers

Carers are highly trained in their roles to support all your health needs.

Our Community Healthcare Workers are trained to your specific care needs, including how to use specific equipment if required. Your package of care is overseen by a Clinical Services Manager (a Registered Nurse) who ensures your carers are able to meet your needs.

We aim to ensure you have the same care team, and we understand how important consistency is once you have found the right carer for you. You will receive a monthly rota, so you will know who to expect for your visits. We can also provide waking night cover so that help is at hand, at all times during the night.

“

Following the death of a loved one, I just wanted to say a huge thank you for the support I received throughout this difficult time.

The care and support that you and your team provided to her, myself and her daughter was incredible, and managing without you would have been inconceivable.

Pass on our complete gratitude to the entire team, for how well they all looked after her during this time, meeting hers and our needs
